

About Us

Mojotech is a software design and development agency headquartered in Providence, RI with offices in New York City, Boulder, and Washington, DC. Mojotech has launched more than 150 products by partnering with clients to not only deliver software, but also:

- Define strategy and kickoff MVP product planning.
- Develop and document best practices during product development.
- Increase manpower and mentor in-house teams to accelerate development — permanently.
- Inject startup DNA into legacy practices using the latest processes, tools and frameworks.

With a client base that ranges from early-stage startups to Fortune 100 companies, Mojotech's award-winning team is composed of engineers, designers, and product managers led by CEO Nick Kishfy. Our innovative projects have been recognized by The New York Times, The Wall Street Journal, TechCrunch, and helped clients secure millions in venture funding, capture market share and drastically improve operations.

Service Offerings

Define your strategy

Being “agile” is not an excuse to take shortcuts. Discovery is a key part of any successful software project – helping to mitigate technical risk, validate user goals and prioritize feature development while the cost of change is at its lowest.

Launch your product

Ship early and often. Working in two week sprints, inspired by user-centric, lean methods, we will get you to market quickly, with real users and a quality solution.

Accelerate your development

When it's time to “hit the gas”, grab an emerging opportunity, or deliver that killer feature, we are ready to augment your in-house team. Our 50 plus Mojoes are experienced in working side-by-side with client teams of all sizes.

Innovate and grow

Technology doesn't stand still. If it's time to bring a legacy process forward in time, roll out a native mobile app, or tackle a UX problem that lies beyond the current strengths of

Capabilities

We work on a simple "Team Strength" engagement basis. Once a project is defined, we work with our clients to meet the desired development velocity.

Our process is 100% transparent and our clients own all of the work we create for them.

We believe that the best way to build a scalable, complex system is to start with a simple system that works well. Our proven design and development process consistently delivers working software and compelling user experiences focused on increasing business value.

- User experience design
- Customer engagement
- Process improvement
- E-commerce
- Healthcare/healthtech
- Insurance/insuretech
